
JUAN PABLO ARCEO NORIEGA

Backend Developer

Mexico, Mexico

github.com/jpabloan · EN

Professional Profile

Backend Developer with 5 years of professional experience, specializing in PHP, CodeIgniter, MySQL, and REST API integration. Experienced in developing integrations with external services, business logic, and administrative tools, as well as providing technical support for operations and diagnosing incidents through production logs.

Currently focused on expanding my knowledge of software architecture and AI-assisted development.

Experience

Enviatodo

Backend Developer / Technical Support · 2021–2026

REST Integrations

Developed REST integrations with logistics providers such as iMile, Sendex, AMPM, BigSmart, and Quality Post, implementing coverage, quoting, shipping label generation, pickup, and tracking workflows according to each provider's capabilities.

Integration Maintenance

Maintained and updated existing integrations with providers such as FedEx, DHL, Estafeta, Paquetexpress, and Redpack, adding new functionality, including pickup processes.

Business Rules

Developed business rules for logistics services, including coverage restrictions by state and customer, pickup availability, and temporary suspension of quoting or shipping label generation.

Administrative Tools

Built internal administrative tools across both interface and backend to perform balance adjustments —charges and credits— resulting from shipping label incidents and compensation claims, as well as functionality for managing roles and internal users.

Operations Support

Provided technical support to Operations by reviewing and monitoring production logs to verify reported incidents, reproducing errors in the local environment, and escalating cases with technical information for resolution.

Experience (continued)

Enviatodo

Backend Developer / Technical Support · 2021–2026

Queries and Reports

Performed ad hoc SQL queries in MySQL to address operational and administrative needs, including shipping label reports by provider, period, and status.

Technologies used at Enviatodo

PHP · CodeIgniter 3 · MySQL · REST APIs · Git · Postman · Linux/SSH

Technical Skills

Backend · PHP · CodeIgniter 3 · REST APIs · External service integrations

Data · MySQL · SQL

Development and Operations · Git · Linux · SSH · Postman · log analysis

Education

Self-taught in software development, with ongoing learning through technical documentation, professional practice, and personal projects.
